**Kick Rating:** 7.5

**Final Judgment Rating:** 8.0

### **Lightning Rods Energy Beef Sticks Review:**

So I normally stick to reviewing Energy Drinks or Shots but every once in awhile something unique comes along where I just have to try it. In the past I have reviewed things like energy patches, caffeinated breath spray, energy strips... you get the idea. So when I heard about the Lightning Rods Energy Beef Sticks I had to get a hold of some samples. With a Minotaur as a mascot the one ounce 60 calorie sticks seem to be a decent deal at \$1.69 per stick or even less when bought in bulk. I guess there is only one way to find out if these power charged meat sticks are the real deal...

### **Lightning Rods Energy Beef Sticks Review: Final Judgment**

Similar taste to your typical beef stick with energy to boot. If you're looking for energy and a snack to boot, look no further. Besides, at \$1.69 they are priced almost identical to you normal beef stick... and you get a pick me up as well.

Two birds with one stone... Final Judgment - 8.0
